Privacy Impact Assessment

UPLD, UPLD, UPLD

Revision: May be accessed on:

The Privacy Management Program Framework (PMPF) is a document that outlines the UP Diliman's commitment to protecting the privacy of its community members. It provides a clear and concise overview of the university's privacy policies and procedures, and serves as a guide for all UP Diliman employees and students. The PMPF is designed to ensure that all personal information collected, stored, and processed by the university is handled in a secure and responsible manner.

The PMPF is based on the principles of transparency, accountability, and respect for individual privacy. It is a living document that will be updated as needed to reflect changes in the university's privacy policies and procedures. The PMPF is available to all UP Diliman employees and students, and is a key component of the university's privacy management program.

The PMPF is organized into several sections, including: **Introduction**, **Scope**, **Definitions**, **Privacy Principles**, **Privacy Policies**, **Privacy Procedures**, **Privacy Training**, **Privacy Audits**, and **Privacy Breach Response**. Each section provides detailed information on the university's privacy practices and procedures.

The PMPF is a key component of the university's privacy management program, and is designed to ensure that all personal information collected, stored, and processed by the university is handled in a secure and responsible manner. The PMPF is available to all UP Diliman employees and students, and is a key component of the university's privacy management program.
